

Krugarand CORPORATION

February 02, 2005

To Whom It May Concern:

High standards, professionalism, commitment to quality workmanship and availability to attend to clients needs are all essential qualities which a company must possess in order to succeed in today's construction industry. Without a doubt, Canadian Stucco meets these requirements and consistently ensures professional services.

By cooperating with both clients and architects, by allowing scheduling flexibility and organizational skills, Canadian Stucco has completed jobs as the enhancement of the building envelope of one of our strip malls at our 1221 Markham Ave. which involved many thousands of square feet of EIFS system.

We have awarded them another contract for work to be done at our 146 Yonge St. (four storey commercial building) location in the fall of 2005.

If any further questions or information is required, feel free to contact myself at any time.

Yours truly,

Joe Rajarartnam
Operations Manager
